

Supervisor pre-read - literature only

19 August 2026 | 09:00-10:00 | Asia/Jerusalem

Ready for Ali review - not delivered, accepted, or closed

0/116 | EXP-005 0/24 | Medical readiness 0/6

Meeting purpose

Review the literature-only Chapter 2 tranche, confirm the evidence boundary, and select one next literature task.

What is prepared

- Pinned the ACL taxonomy repository and reconciled 525 occurrences into 116 works.
- Created six page-level anchors into the ACL survey and twelve conservative screening candidates.
- Produced matched English and Hebrew Chapter 2 drafts and one bilingual classification slide.
- Kept QL-01-QL-05 unexecuted, Section 4 frozen, EXP-005 at 0/24, and medical readiness at 0/6.

Proposed walkthrough

1. Evidence boundary and package status
2. Pinned corpus and taxonomy coverage
3. Chapter 2 synthesis and candidate gaps
4. Open research and methodology choices
5. Decision read-back and one next task

Decisions requested

- A12-003; D12-003 | Confirm or correct the Chapter 2 structure and evidence hierarchy.
- D12-002; Q12-009; R12-007 | Is the bounded ACL corpus plus twelve-work human screening sufficient for the proposal-stage literature chapter?

- A12-002; A12-004; Q12-009 | Confirm the twelve-work human screening tranche as the single next task, or replace it with one named database query.
- A12-010; Q12-006; R12-008 | Retain, revise later, or supersede the frozen pre-existing Section 4 methodology draft after Chapter 2 review.

Recommended next task

Human-screen the twelve conservative candidates in the native workbook, with identity verification and separate author-conclusion and researcher-synthesis fields.
