| Study 2               |                                                                   |                                               | Contract -> study    |                      |                      |                      |                      |
| Study 3               |                                                                   |                                               |                      |                      | Target               |                      |                      |
| Integrated evaluation |                                                                   |                                               |                      |                      |                      |                      | Thesis               |
| Publications          |                                                                   |                                               | Paper 1              |                      | Paper 2              | Paper 3 defence      |                      |
| Conditional medical   |                                                                   | go / no-go - Sep 2029 Medical 0/6             |                      |                      |                      |                      |                      |

EXP-005 remains 0/24; medical readiness remains 0/6. This plan makes no readiness claim.

|                                                                                                                                          |                                                                                     |
|------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
| <b>S1</b> Executed review with screening and inclusion counts; taxonomy first version; preregistered Study 1 protocol; labeled baseline. | <b>S4</b> Study 2 empirical report, Paper 2 submission, and governed source corpus. |
| <b>S2</b> Study 1 artifact, evaluation package, and Paper 1 submission.                                                                  | <b>S5</b> Study 3 artifact, target evaluation, and Paper 3 submission.              |
| <b>S3</b> Governed-judgment contract, conformance suite, and reference implementation.                                                   | <b>S6</b> Integrated thesis contribution, dissertation, and review package.         |

Author-generated plan. The preparatory year is shown outside the three-year count. The medical extension is conditional, off the critical path, and gated; none of its six entry gates is satisfied.
